

DETAILED PROJECT REPORT

सविस्तर प्रकल्प अहवाल

Small Kirana Store

लघु किराणा दुकान

Promoter	Amaan Patel
Village	Ajmir Saundane
District / State	Nashik, Maharashtra
Report reference	GS-421dd6c6-96d4-4ee6-a462-3a0557dcbd0a
Report date	2026-09-12
Projection period	7 project years / 84 months
Selected scenario	MUDRA-KISHOR

INFEASIBLE / UNVERIFIED FINANCING SCENARIO

Prepared for discussion and independent appraisal. This report is not a sanction letter, verified valuation, supplier quotation or confirmation of scheme eligibility.

Particulars	Amount
Project cost — including WC margin	₹50,00,000
Total funding — including full WC	₹73,96,250

All monetary calculations use integer paise. Nonzero paise are retained in displayed amounts. Annual figures are sums of monthly engine outputs, except opening and closing balances.

Assumption status: illustrative_unverified. No government emblem, bank logo or approval representation is used.

2. Promoter profile

२. प्रवर्तकाची माहिती

Name	Amaan Patel
Address	Not established
Village	Ajmir Saundane
District / State	Nashik, Maharashtra
Education	Not established
Experience	Not established
Reported skills	farming
Premises	Applicant-reported: rented; unverified
Power availability	Applicant-reported: single_phase; unverified
Funds available after household reserves	₹5,00,000
Contribution applied to project	₹5,00,000

Verification status

पडताळणीची स्थिती

Promoter details are supplied inputs, not independently verified facts. Available funds are treated as net of household emergency reserves. Funds exceeding project cost are not automatically invested.

Documents to obtain

प्राप्त करावयाची कागदपत्रे

- Identity and address documents through an appropriate secure process.
- Evidence of own contribution and household affordability.
- Premises ownership or lease permission and power feasibility.
- Training or experience evidence, where required.
- Applicable registrations and lender-specific application documents.

No identity document numbers or bank-account details are required by this MVP PDF generator.

3. Project and market rationale

३. प्रकल्प व बाजारपेठेचा आधार

Illustrative Small Kirana Store scenario; local validation required.

Enterprise	Small Kirana Store
Category	retail
Planning catchment	2000 metres; archetype assumption, not measured demand
Required skills	retail_sales, bookkeeping
Inputs / customer materials	
Power requirement	single_phase
Rated economics	1800 average retail basket per month at ₹150 per unit, before scale and utilisation adjustments

Market observations supplied

प्राप्त बाजारपेठ निरीक्षणे

No verified local market observations were supplied.

The configured catchment, competition categories and demand coefficient are planning inputs. They do not establish local demand. This report does not apply the demand coefficient as an additional revenue multiplier.

Explicit unknowns and validation gaps

अज्ञात बाबी व पडताळणीतील उणिवा

- Equipment specifications, quantities, supplier identities and written quotations have not been established by this report.
- Local demand, achieved milling fee, competitor capacity and customer commitments are not independently verified.
- Required registrations, site suitability, power connection and lender sanction require documentary verification.
- Promoter address: not established.
- Education: not established.
- Relevant experience: not established.
- Lender terms, eligibility and applicant-reported inputs require verification.
- No personalized geographic viability result is incorporated in this report.

4. Project cost and means of finance

४. प्रकल्प खर्च व वित्तपुरवठा

Project cost

प्रकल्प खर्च

Particulars	Amount
Machinery — itemisation pending	₹16,00,000
Civil works — not machinery	₹6,00,000
Installation — not machinery	₹2,00,000
Preliminary expenses	₹72,000
Contingency	₹1,20,000
Working-capital margin	₹7,98,750
TOTAL PROJECT COST	₹50,00,000

Means of finance

वित्तपुरवठ्याची साधने

Particulars	Amount
Promoter contribution	₹5,00,000
Proposed term loan	₹45,00,000
TOTAL MEANS OF FINANCE	₹50,00,000

Exact reconciliation: PASSED.

Promoter contribution + initial term loan = project cost.

Cash credit is excluded from this comparison because project cost includes only the WC margin.

Working capital and total initial funding

खेळते भांडवल व एकूण प्रारंभिक निधी

Particulars	Amount
Inventory	₹38,25,000
Receivables	₹9,00,000
Less: payables	₹15,30,000
Net working-capital requirement	₹31,95,000
Promoter / project WC margin	₹7,98,750
Proposed cash-credit limit	₹23,96,250

Total sources ₹73,96,250 = fixed investment ₹25,92,000 + net WC requirement ₹31,95,000.

Month 0: financing inflow ₹73,96,250; investment/WC outflow ₹73,96,250; closing cash ₹0.

Pending back-ended subsidy: ₹0. Applied upfront: ₹0. A pending subsidy does not reduce initial borrowing.

Financing constraint result

वित्तपुरवठा अटीचा निकाल

INFEASIBLE / UNVERIFIED FINANCING SCENARIO

- Debt service exceeds 50% of monthly surplus in months: 7, 12

Reconciliation proves arithmetic equality, not affordability or sanction.

5. Machinery and capital works

५. यंत्रसामग्री व भांडवली कामे

Amounts below are the archetype's capex categories scaled by the financial engine. The source configuration does not contain individual machine quantities or supplier quotations.

Particulars	Amount
Machinery — itemisation pending	₹16,00,000
Civil works — not machinery	₹6,00,000
Installation — not machinery	₹2,00,000
TOTAL CONFIGURED BASE CAPEX	₹24,00,000

Machinery specification status

यंत्रसामग्री तपशीलांची स्थिती

Required detail	Status
Individual equipment list and quantities	Not established
Make, model, rated capacity and load	Not established
Supplier and quotation date / validity	Not established
Tax, freight and installation inclusions	Not established
Warranty, servicing and spare parts	Not established
Site layout and safety requirements	Not established

Civil works and installation are shown separately and are not represented as machines. Preliminary expenses, contingency and WC margin are included on page 4, not within the configured base-capex total above.

Obtain itemised written quotations and validate capacity against seasonal peak throughput before using these estimates for an actual financing application.

Archetype operating assumptions

व्यवसाय प्रकाराची कार्यकारी गृहीतके

- Average basket and 15 percent contribution margin are illustrative.
- Retail stock is included in working capital, not duplicated in capex.
- Own premises assumed; owner drawings are separate.
- Bad debts, shrinkage, stock expiry and GST treatment need local validation.
- A retail business must not be automatically marked eligible for every manufacturing-oriented scheme.

6. Multi-year financial projections

६. बहु-वर्षीय आर्थिक अंदाज

Amounts in INR; nonzero paise retained. Years are project years, not necessarily financial years. The projection covers 84 months, matching the financed loan's tenure.

Profit and loss

नफा व तोटा

Particulars	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6	Year 7
Revenue	₹4,53,60,000	₹5,94,86,400	₹7,18,03,584	₹7,75,47,870.71	₹8,37,51,700.36	₹9,04,51,836.39	₹9,76,87,983.33

Owner drawings — included above	₹36,000	₹36,000	₹36,000	₹36,000	₹36,000	₹36,000	₹36,000

Month-0 funding and investment reconcile on page 4. Operating cash is after owner drawings but before debt service. Incremental WC is shown separately; negative values represent releases.

Term interest accrued includes moratorium interest. Cash debt service excludes unpaid capitalised interest until repaid through the loan. No automatic balancing loan is inserted.

Months with negative closing cash: None under stated assumptions.

CC principal outstanding at projection end: ₹23,96,250. Terminal repayment of this CC principal is not included.

7. Breakeven, DSCR and repayment

७. समतोल बिंदू, कर्जसेवा गुणोत्तर व परतफेड

Year-1 cash operating breakeven: revenue ₹2,56,00,000; 170667 units. Fixed operating expenses only; excludes depreciation, financing and drawings.

Project year	1	2	3	4	5	6	7
Cash available for debt service	₹29,28,000	₹48,54,960	₹65,00,937.60	₹71,50,900.56	₹78,59,211.04	₹86,30,854.24	₹94,71,230.16
Debt service	₹7,50,697.14	₹12,13,844.28	₹12,13,844.28	₹12,13,844.28	₹12,13,844.28	₹12,13,844.28	₹12,13,844.18
DSCR	3.90	4.00	5.36	5.89	6.47	7.11	7.80
Core 1.25× benchmark	Met	Met	Met	Met	Met	Met	Met

Monthly term-loan schedule — 84 months; moratorium: first 6 months. Step-up: no. At this tenure, the complete month-by-month ledger exceeds this report's fixed page format. The quarterly repayment schedule on page 8 is aggregated from the identical monthly calculation (app/fin/core.repayment_schedule) and covers the full tenure exactly.

Capitalised term interest: ₹1,83,026.80. Peak monthly term payment + CC interest: ₹1,01,153.69. CC is separate from this term-loan ledger.

8. Financial structuring, quarterly view and operating costs

८. वित्तीय रचना, त्रैमासिक वेळापत्रक व परिचालन खर्च

Cost model: PS-mandated margin-based scheme router (primary path). Your ₹5,00,000 margin supports a ₹50,00,000 project cost with ₹45,00,000 loan eligibility → routed to Term Loan Scheme.

Scheme	Term Loan Scheme
Interest rate	8.00%
Tenure	84 months
Moratorium	6 months
Margin (10% of project cost)	₹5,00,000
Maximum loan eligibility (90%)	₹45,00,000
Business scale derived from project cost	2000.00%

Working-capital requirement: see page 4 (₹31,95,000 net requirement; ₹23,96,250 cash credit).

Operational costs breakdown

परिचालन खर्चाचे विभाजन

Rated monthly economics, before capacity ramp-up or seasonality.

Particulars	Amount
Monthly revenue — rated	₹54,00,000
Monthly variable cost	₹45,90,000
Monthly fixed cost	₹3,20,000
TOTAL MONTHLY OPERATING COST	₹49,10,000
Annual operating cost — rated, no ramp-up	₹5,89,20,000

Quarterly repayment schedule

त्रैमासिक परतफेड वेळापत्रक

28 quarters; amounts are the sum (flow) or period-end balance (opening/closing) of the three months in each quarter. The complete monthly schedule is on page 7.

Qtr	Opening	Interest paid	Interest capitalised	Principal paid	Payment	Closing
1	₹45,00,000	₹0	₹90,601.33	₹0	₹0	₹45,90,601.33

9. Hyper-local business feasibility report

९. स्थानिक व्यवसाय व्यवहार्यता अहवाल

Narrative only. Every figure below was already computed elsewhere in this report; this section does not calculate anything new.

Market reach

बाजारपेठेची व्याप्ती

The business covers a catchment population of 5749 within a radius of 2000 metres. The nearest town is SATANA at a distance of 8.0 km. Suggested channels include walk-in retail at the unit, local haat/weekly market stalls, and informal delivery to nearby households.

Opportunity analysis

संधी विश्लेषण

A Small Kirana Store can serve daily household retail demands. Evidence is absent for reported crops and reported amenities, so specific niche opportunities based on local produce or infrastructure cannot be detailed.

SWOT

बलस्थाने, कच्चे दुवे, संधी, धोके

Strengths	The applicant provides full capital of ₹169,537.50 against the total project cost of ₹169,537.50. This full equity coverage lowers financial dependency on loans.
Weaknesses	Investing the entire project cost of ₹169,537.50 using applicant own capital of ₹169,537.50 limits immediate liquidity for other needs.
Opportunities	Fully funding the project cost of ₹169,537.50 through applicant own capital of ₹169,537.50 enables rapid setup of the retail store.
Threats	Unexpected market downturns could risk the full project cost of ₹169,537.50 funded by applicant own capital of ₹169,537.50.

Threats

जोखीम

Evidence is absent for required inputs, so specific supply chain bottlenecks cannot be determined. Demand may decline during low-season months of February, June, July, and December. Over-reliance on a single buyer poses a key commercial risk.

Competitor mapping

स्पर्धक मॅपिंग

Not established — Mapped POIs counted, but category coverage has not been reviewed. No competitor-absence inference. This note is passed through verbatim from the computed market-gap sub-score; it is not restated or embellished by the language model.

Product / market value

उत्पादन/बाजार मूल्य

Pricing guidance is based on ₹150 per average retail basket. The population percentile of 96.85% serves as a purchasing-power indicator for local market demand.

10. Employment, risks and annexure

१०. रोजगार, जोखीम व परिशिष्ट

Employment

रोजगार

Proprietor roles: Not established; paid full-time jobs: Not established; paid part-time jobs: Not established. Wage-cost basis: Not established. These are proposed roles, not verified jobs created.

Risk factors

जोखीम घटक

- Demand, throughput and input/service prices may differ materially from these illustrative assumptions.
- Power interruptions, machine downtime and repair costs can reduce cash generation; supplier warranty and service support are unverified.
- Seasonal working-capital peaks and household withdrawals can create cash deficits. No rescue financing is inserted.
- Financing rates, eligibility, CC renewal and any subsidy timing remain subject to independent lender verification.
- Derived scale 41.7x exceeds the 20.0x cap on this archetype's rated unit economics; capped at that multiple. Revenue and cost figures beyond this point are not a credible basis for this project size.

Financial assumptions annexure

आर्थिक गृहीतकांचे परिशिष्ट

- Projection: 84 project months; first calendar month 1; scale 2000.00% (derived from margin ÷ archetype base capex). Core utilisation: 70% in year 1, 85% in year 2, 95% from year 3 onward; archetype seasonality applied.
- Nominal annual price/mix growth 8.00%; fixed-cost growth 5.00%. Growth is not an assertion of increased physical capacity.
- Preliminary expenses 3.00% and contingency 5.00% of base capex; WC margin 25.00%. WC uses rated unseasonal sales; seasonal peaks are unverified.
- Machinery depreciation: 15.00% annual written-down value. Cash tax: 0.00% of positive monthly PBT; not a determination of statutory tax liability.
- Term rate 8.00%; CC rate 12.00%; tenure 84 months including 6 moratorium months; step-up no.
- Moratorium interest is capitalised into debt and included in model P&L interest expense. If step-up is selected, the first 12 repayment payments are 70% of the ordinary payment; remaining payments are recalculated.
- CC is fully drawn at inception, interest-only and outstanding through the projection; no automatic CC repayment or renewal approval is assumed.
- DSCR = (EBITDA – cash tax – incremental WC – drawings) / (term payments + CC interest). The lender's definition may differ. Solver threshold: 125.00% coverage; monthly debt service must not exceed 50% of pre-debt surplus.
- Default scenario assumes drawings of ₹3,000/month, zero incremental working capital and zero cash tax. These are explicit unverified inputs, not findings about household needs or tax exemption.

Data sources and provenance

माहितीचे स्रोत व उगम

- Archetype configuration snapshot — app/archetypes/configs/kirana_store.json. Illustrative, unverified costs and unit economics.
- Assessment profile and scenario inputs — assessment:1c98a6c3-e15f-4e33-aba7-a57b08312745. Applicant-supplied information; not independently verified.
- Imported village identity — village_lgd:550150. Village identity only. No local market counts or geographic viability findings are asserted.
